SEE FINCH & CO CATALOGUE NO. 6, ITEM NO. 24, FOR AN EXAMPLE OF A SECTIONED ANATOMICAL MODEL OF THE HUMAN HEAD

LITERATURE

WAX MODELS WERE INTRODUCED IN EUROPE FOR THE TEACHING OF ANATOMY SHORTLY AFTER THE RENAISSANCE.

DURING THE 18TH CENTURY WITH THE DEVELOPMENT AND ADVANCE OF MEDICAL EDUCATION THE DEMAND FOR NATURAL ANATOMIC TEACHING SPECIMENS FAR OUTSTRIPPED THE AVAILABLE SUPPLY. WAX MODELS PROVED A USEFUL MEANS FOR DEMONSTRATING ANATOMIC POINTS AS WELL AS BEING LESS PERISHABLE AND LESS ODIFEROUS. THE LIFELIKE COLOURS AND TEXTURES OF THE SKIN IN WAX MODELS WAS SUPERIOR TO THAT OF CADAVERS AND THEIR RESISTANCE TO DETERIORATION WAS A DEFINITE ADVANTAGE OVER ACTUAL PRESERVED SPECIMENS. ALTHOUGH WAX MODELS ARE NO LONGER MADE THE ANTIQUE ONES REMAIN USEFUL AS TEACHING AIDS AND AS RECORDS OF CHANGES IN THE DIAGNOSIS AND APPEARANCE OF DISEASES. UNIQUE AND FASCINATING THEY ARE NOW AN ALMOST LOST FORM OF ART AND REPRESENTATION.
