## **LITERATURE**

CAPTAIN JAMES COOK FIRST SET FOOT ON NEW ZEALAND SOIL IN 1769 AND HE AND HIS CREW  
RECORDED THEIR FIRST VISIT BY WAY OF CHARTS, MAPS AND COLLECTED FAUNA, FLORA AND  
CURIOSITIES. COOK'S THREE VOYAGES MARKED THE BEGINNING OF BOTANICAL RESEARCH IN THE  
SOUTH SEA ISLANDS, BUT MANY MORE EXPEDITIONS WERE REQUIRED BEFORE THE MARVELLOUS  
DIVERSITY OF THE FLORA WAS PROPERLY SURVEYED. EVEN SO WHEN THE 'ENDEAVOUR' RETURNED  
HOME THE CABINS WERE FULL TO OVERFLOWING WITH 30,000 PLANT SPECIMENS, AND JOSEPH BANKS  
WAS TO REMAIN AT THE CENTRE OF SCIENTIFIC ACTIVITY FOR MORE THAN 40 YEARS PROMOTING THE  
ROLE OF SCIENTISTS IN VOYAGES OF DISCOVERY, AND THE POSSIBILITIES OF WHAT IS NOW CALLED  
'ECONOMIC BOTANY', ESPECIALLY THE TRANSFER OF PLANTS FROM ONE PART OF THE WORLD TO  
ANOTHER.

NEW ZEALAND HAS BEEN A LAND APART FOR 80 MILLION YEARS WITH THE RESULT THAT IT IS HOME TO A

COLLECTION OF PLANTS AND ANIMALS FOUND NOWHERE ELSE IN THE WORLD. THE GIANT TREE FERN IS NOW GROWN IN GARDENS ALL OVER THE TEMPERATE WORLD, BUT IN THE MID 19TH CENTURY THE VICTORIANS WERE STILL ORGANISING AND FUNDING COLLECTING TRIPS TO FIND UNKNOWN SPECIMENS OF FERNS. THE VICTORIANS HELD A PARTICULAR FASCINATION FOR THEM CREATING SPECIAL 'FERNERIES' IN CONSERVATORIES AND CONSTRUCTING ENTIRE FERN GARDENS, SO THIS SOUVENIR OF NEW ZEALAND'S UNIQUE FERNS WOULD HAVE BEEN A 'MUST HAVE'.
