HOARD OF 13 EARLY CELTIC IRON AGE NORTHERN GAUL BRONZE SOCKETED AXE HEADS

A RARE HOARD OF 13 EARLY CELTIC IRON AGE NORTHERN GAUL BRONZE SOCKETED AXE HEADS

FOUND IN LONGRAVE, CAEN, FRANCE IN 1929 DURING THE CLEARING OF A FOREST

CIRCA 800 – 400 BC

SIZE: APPROX: 7.5CM HIGH, 8CM WIDE, 3CM DEEP – 3 INS HIGH, 3¼ INS WIDE, 1 INS DEEP (EACH)

LITERATURE

THE CELTIC IRON AGE ROUGHLY DESCRIBES THE PERIOD FROM ABOUT 800 BC UNTIL THE ROMAN CONQUEST OF BRITAIN AND NORTHERN FRANCE AROUND AD 43. IT WAS A TIME OF HUGE SOCIAL AND ECONOMIC CHANGE. IT WITNESSED THE END OF THE BRONZE AGE CYCLE OF SUBSISTENCE FARMING AND THE BEGINNING OF A MORE COMPLEX EUROPE, WHICH IN ALL ITS ESSENTIALS WAS TO CHANGE LITTLE UNTIL THE AGE OF EXPLORATION AND THE CONQUERING OF THE OCEANS IN THE 16TH CENTURY.

DURING THE LATE BRONZE AND EARLY IRON AGES INDIVIDUALS OF HIGH STATUS MAINTAINED THEIR POSITION BY CONTROLLING THE SUPPLY AND EXCHANGE OF COPPER ALLOY GOODS. IT IS BELIEVED THAT DEMAND FROM THE MEDITERRANEAN STATES CREATED AN OVER STIMULATION OF BRONZE PRODUCTION IN BOTH BRITTANY AND BRITAIN AND THAT THESE SURPLUSES SAW LARGE QUANTITIES OF THE ALLOY TAKEN FROM CIRCULATION AND BURIED IN THE GROUND, OR THROWN INTO RIVERS AND MARSHES AS VOTIVE OFFERINGS. THE INCREASE OF THESE BURIED 'HOARDS' AT THIS TIME HAS BEEN EXPLAINED AS A SOCIO-RELIGIOUS MECHANISM TO REMOVE THE SURPLUS FROM CIRCULATION, THUS INCREASING THE VALUE OF THE METAL AND THE STATUS OF ELITE INDIVIDUALS.
