SEE: FINCH & CO CATALOGUE NO. 12, ITEM NO. 106, FOR AN ESKIMO HUNTING CLUB MADE FROM THE PENIS BONE OF AN
ARCTIC WALRUS

LITERATURE

IN 1604 STEPHEN BENNETT, AN ENGLISH SAILOR AND ADVENTURER, BROUGHT BACK TO LONDON A LIVING YOUNG WALRUS HE HAD CAPTURED IN THE BEAR ISLANDS. IT EXCITED MUCH CURIOSITY; 'THE KING AND MANY HONOURABLE PERSONAGES BEHELD IT WITH ADMIRATION FOR THE STRANGENESS OF THE SAME, THE LIKE WHERE OF HAD NEVER BEFORE BEEN SEENE ALIVE IN ENGLAND'.

KNOWN BY SAILORS AS THE 'SEA HORSE', 19TH CENTURY NATURALISTS BELIEVED THE WALRUS TO BE THE CONNECTING LINK BETWEEN MAMMALS OF THE LAND AND THOSE OF THE SEA. THE MALE WALRUS LACKS ANY EXTERNALLY VISIBLE PENIS, AND IN ORDER TO CONTROL BODY TEMPERATURE IN FREEZING ARCTIC WATERS, IT IS INTERNAL AND SUPPORTED BY A LARGE BONE, A 'BACULUM'. MATING TAKES PLACE ON LAND IN THE LATE SPRING AND EARLY SUMMER.
