LITERATURE

MUCH OF WHAT WE KNOW ABOUT BRONZE AGE METALLURGY COMES FROM THE FINDS OF BRONZE HOARDS, USUALLY OF TOOLS SUCH AS AXE HEADS, BUT SOMETIMES OF WEAPONS, WHICH WERE LEFT BURIED IN THE GROUND PRESUMABLY FOR LATER RECOVERY. BRONZE AXE HEADS AND SWORDS WERE ALSO BURIED WITH THE DEAD, AND IMPORTANTLY ACTED AS VOTIVE OFFERINGS TO THE GODS, WHOSE WORLD PROBABLY MIRRORED THAT OF THE LIVING. SUCCESS WAS MEASURED BY BRONZE AGE SOCIETY IN THE QUANTITIES OF DESIRABLE MATERIALS AND OF OBJECTS AVAILABLE FOR THEIR DISPOSAL. BRONZE ACTED AS A MATERIAL OF PRIME VALUE, A 'PROTO CURRENCY', NOT IN STANDARDISED UNITS, BUT SOMEWHAT LIKE THE 'FAMILY SILVER' WHICH CAN BE USED FOR ELEGANT DISPLAY AND ALSO EXCHANGED FOR EVERYDAY NECESSITIES WHEN TIMES ARE HARD.
